## Hur ska ITHU jobba under 2016 för att öka synligheten och utveckla samarbeten med andra aktörer

time is up

På ITHU:s årsmöte 2016 bestämdes att vi gemensamt ska brainstorma nya idéer om framtida satsningar och förbättringar för ITHU:s verksamhet. Här kan alla i ITHU-nätverket bidra med idéer och reflektioner, dock senast den 2 maj. Styrgruppen sammanställer och presenterar allt som kommit in på ITHU:s nätverksmöte den 3 maj.

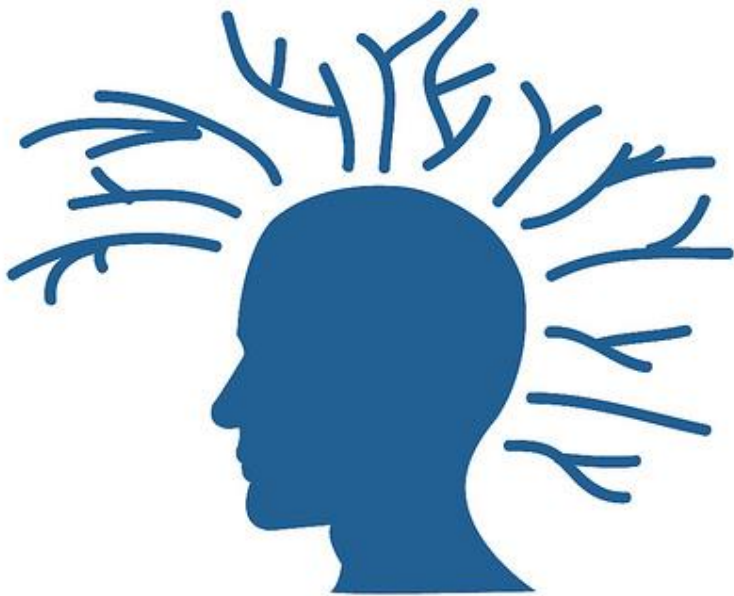

Här är några saker som diskuterades på årsmötet:

- öka ITHU:s synlighet på lärosäten där webben är en viktig kanal
- aktiviteter ska synas bättre på ithu.se
- fortsätta anordna webinarier, helst i olika konstellationer mellan lärosäten.
- två internet
- arbetsgrupper: Play, LMS, digital examination
- lobbyverksamhet och remissinstans inom IT & lärande
- Vi behöver fördjupa samarbetet med Swednet, inte bara genom webinarier. Swednet har nu startat en grupp om IT & lärande och söker intresserade från ITHU. Kan vi ordna ett gemensamt möte med Swednet under NU2016?
- Form och information om våra månadsmöten borde ses över. Ibland är det oklart vad mötet handlar om. Temamöten?
- Hur skapar vi en mer levande diskussion på nätet. Kan vi skapa en gemensam diskussionsforum tillsammans med de andra grupperingar inom SUNET?

## Welcome!

This guide presents a selection of digital tools that you can use in your studies. We provide a selection of tools that we have tested and recommend but there are of course many excellent tools that are not included. These tools can be seen as a complement to the learning platform (Moodle) where all your course communication takes place. All tools here are free to use in their basic format but if you want more features and security then there is normally also a Pro version that you have to pay for. Please contact us if you would like to recommend one for inclusion.

*Please note: These tools are not supported by the university. They are for personal use and to collaborate with your colleagues. If you have problems with any tools you should contact the relevant company or refer to online discussion forums.*

## Smarter collaboration

"WRPUSI teaches collaboration." The room. CC BY-NC 2.0 by Ben Wirtock

Learning involves collaboration and interaction, through group work, projects, field work etc. Today there are many user friendly and effective tools that make it easy to collaborate both on campus and online. Here you will find a selection of digital tools and services that you can use in your studies.

This guide consists of a number of categories (tabs above) with the following titles:

- Collaborative writing**  
Write together on the same document and all changes are automatically saved and tracked. Great for project work, dissertations, lesson notes etc. when you need to get input from many in one document.
- Shared workspace**  
A workspace on a web page where everyone with the link can contribute. Everyone can write, draw, uploads films, photos, diagrams, links etc. Everything saved in one place and accessible for all.
- Curate**  
Collect links to articles, lectures, films, slideshows in one place. Suitable for collections.

## Search

## CC Search

Sök efter bilder, musik, ljud, filmer som du får återanvända så länge du anger källa och följer licensvillkoren.
